

School Centred ITT

NORTHERN LIGHTS

**Leeds Trinity
University**

PGCE in Mathematics

Why train in a School Centred ITT Partnership?

School Centred Initial Teacher Training is a route into teaching designed to provide hands on practical experience from the very beginning. The Northern Lights SCITT programme, which leads to QTS and 60 Masters credits, is delivered in partnership with Leeds Trinity University by a partnership of schools based in the southern end of the Yorkshire Dales, Harrogate and Bradford. Training will be delivered by a team of outstanding specialist practitioners and experts, and will develop a subject specific toolkit designed to achieve success in the classroom.

Good Maths Teachers are in high demand, and with good reason. A career in teaching Maths constantly presents fresh challenges that reap high levels of job satisfaction. Maths is a key curriculum subject which is essential to success both in further education and the workplace. If you have a top degree and train as a Maths Teacher, bursaries of up to £25,000 are available.

During the course you have a range of opportunities to observe, team teach and plan dynamic sequences of lessons based on applications of Maths as well as theoretical concepts. The opportunity to demonstrate the many vocational settings where Maths principles and skills are used brings considerable satisfaction. What are you waiting for?

Entry requirements

Acceptance onto the course is contingent upon the following:

- An honours degree in Maths or related subject at classification 2.1 or above
- Advanced level qualifications (or equivalent) in Maths
- Strong communication skills in written and spoken English
- Have passed skills tests in English and Maths
- DBS clearance and medical check

Desirable skills and qualities:

- Recent experience of working with secondary age children
- Recent experience as a trainer/teacher/mentor
- Competent use of ICT skills
